

7th January 2019

Dear Sir/Madam,

Reference Ranger Electrical Services

Tarporley High School and Sixth Form College has engaged Ranger Electrical Services to undertake repairs and maintenance on its electrical systems since the Autumn of 2017. During this time the company has supported the school in terms of routine electrical works and our cyclical maintenance programme. In addition Ranger Electrical have tendered for larger project work, which the company has won, and these schemes have been successfully completed.

In our dealings with Ranger Electrical Services, we have found them to be professional and competent engineers. All operatives are polite, willing and well presented, the school has experienced no issues from this contractor whilst on site.

Safeguarding of our students, staff and visitors to the site is of paramount importance to the school, all the engineers that attend site have an enhanced DBS check and Ranger Electrical have provided us with the required details of these checks for our central record. In addition Ranger Electrical operate a rigorous Health and Safety regime, with risk assessments and work instructions readily available for the client to review.

Based upon the work that Ranger Electrical have undertaken for the school, we would have no reservation in recommending them as a contractor for electrical repairs or larger installation works.

Yours sincerely

J N Hayes

Director of Finance and Operations
